

100-foot photovoltaic energy storage container for emergency relief in Estonia

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

Why should you choose a modular energy storage container?

Advanced monitoring systems and IoT integration ensure optimal performance and remote management capabilities. The modular design allows for easy expansion, with the option to expand the battery storage system by 100 - 500kwh, making our energy storage container perfect for meeting growing energy demands.
