

12V to 48V automatic switching inverter

Overview

What is a 12V 48V inverter?

These 12V-48V inverters mark Sterlings move to incorporate more 48V equipment into our ranges, as the general voltage in use in domestic and storage applications rises. The PSxx range have twin sockets - max draw is 13A plug from each socket. Therefore if you have a 4000W PS - max draw is 3000W from 1x socket and 1000W from the other.

What type of inverter is used in a DC transmission line?

These are designed to switch on at the interval corresponding to the normal cycle of AC power source. Power inverters, DC (12V, 24V, 48V) to AC (110V, 120V, 220V, 230V, 240V) 50Hz/60Hz pure sine wave inverters. Where does an inverter being used: DC transmission lines need power inverters to deliver power to our load centers.
