

12v to 220v inverter boost module

Overview

What is a 150W DC to AC 110V 220V transformer power car converter?

Estimated Delivery?

The 150W DC 12V to AC 110V 220V Inverter Boost Module Board Transformer Power Car Converter is a versatile electronic device designed to efficiently convert direct current (DC) power from a 12V source, such as a car battery, into alternating current (AC) power at either 110V or 220V.

What is 12V DC to 220V AC converter?

The conversion voltage is converted from 12v dc to 220v ac converter, and the output waveform is a frequency square wave. Using high-quality PCB board, this inverter module is very durable after long time use. This inverter module is mainly used in the inverter stage before electronic DIY work.

What is a DC to AC converter module?

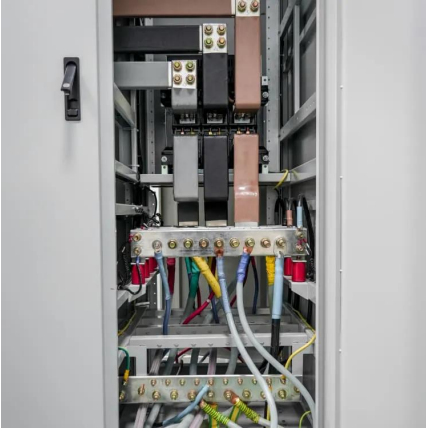

This dc to ac converter module is capable of delivering a continuous power output of up to 150 watts. The module accepts a DC input voltage of 12V making the inverter ideal for use in vehicles, such as cars, trucks, RVs, and boats. The inverter provides the flexibility to choose between two output voltage options: 110V and 220V.

What is a DC-AC inverter power supply?

It is a DC-AC inverter power supply. This product is high-frequency current. The voltage cannot be measured by an ordinary universal meter. You need a professional high-frequency universal meter to test the voltage. It can be used to provide routers during power outages or outdoors, Mobile phone charging, lighting and so on.
