

15MWh Energy Storage Container in India

Overview

How many battery energy storage systems did India install in 2024?

India installed over 341 MWh of battery energy storage systems (BESS) in 2024, marking an over sixfold increase from the 51 MWh installed in 2023, according to Mercom India Research's newly released report India's Energy Storage Landscape.

How big is India's battery energy storage capacity?

With these additions, India's total installed battery energy storage capacity stood at approximately 442 MWh as of December 2024.

What is strategic paths for energy storage in India through 2032?

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, highlights priority areas, and explores how different technologies can work for us.

Why do we need energy storage systems in South India?

South India, home to some of the country's largest renewable energy projects, particularly in solar and wind power, is driving the need for energy storage systems (ESS) to ensure grid stability and optimize energy usage.
