

18 kilowatts of solar power generation

Overview

How many kWh does an 18 kW solar system produce?

(Load Per Day) An 18 kW solar system typically produces an output of 90 kWh per day. However, it's important to note that the actual production depends on several factors, such as the amount of sunlight the panels receive. To achieve optimal output, the panels should receive a minimum of 5 hours of direct sunlight each day.

How much does an 18kW Solar System cost?

The typical cost for an 18kW solar system is around \$36,000. However, it's important to note that prices have come down substantially over the past 10 years, making solar systems more affordable and accessible for homeowners and businesses. Source: The National Renewable Energy Laboratory (NREL).

Do I need a 18kW Solar System?

Whether or not you need a 18kW solar system will depend on many things. If you are a Commercial customer and you use between 69.8kWhs and 108.6kWhs then a 18kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 18kW solar system quotes.

Are 18kW solar power systems suitable for small businesses?

18kW solar power systems are mostly suitable for small businesses with low energy needs. This size of solar power system is classed as "Commercial". A 18kW solar system will certainly cost a different amount depending on the solar business you buy it from. Prices also vary from city to city due to logistics, taxes etc.
