

1MW Albanian Solar Container Used at Airport

Overview

How much does a solar power plant cost in Albania?

In April 2025, Albania's Ministry of Energy and Infrastructure unveiled plans to construct a 3.3 MW solar power plant on 5.2 hectares of land in Korça. The project, estimated to cost around 2.7 million euros, is set to be completed in 12 months. The Korça solar plant is part of a broader strategy to boost Albania's renewable energy capacity.

What are Albania's new solar projects?

These solar projects are expected to add 240 MW of capacity, significantly enhancing the country's renewable energy portfolio. The French renewable energy company Voltalia has announced plans to build new energy projects in Albania, including the Karavasta and Spitalla solar parks.

Does Albania have solar power?

Albania is making significant strides in renewable energy, particularly through solar power projects. Here's a closer look at some of the major solar panel projects and developments in the country as of 2025.

Which solar parks will boost Albania's energy production capacity?

The Karavasta solar park is one of the largest in the region and is expected to provide a significant boost to the country's energy production capacity. The Spitalla solar park, although smaller, is another important addition to Albania's growing renewable energy infrastructure.
