

2025 China Communications 5G Base Station Bidding Company

Overview

How many 5G base stations will China have in 2025?

China's Ministry of Industry and Information Technology (MIIT) unveiled plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. Under this plan, China aims to have 26 5G base stations for every 10,000 people by the end of 2025.

How many 5G base stations are there in 2024?

"Accumulatively, there were over 2.4 million 5G base stations put into use [at the end of 2024]. We have built the world's first large-scale commercial 5G-A network, with RedCap covering all cities nationwide and gigabit broadband covering 480 million households," said China Mobile in its annual report.

Will China build the world's largest 5G network by 2025?

Meanwhile, Wang Zhiqin, deputy head of the China Academy of Information and Communications Technology, a government think tank, said China will have built the world's largest and most extensive Standalone 5G network by the end of 2025.

What percentage of mobile connections will be 5G in 2025?

By 2025, one in four mobile connections is expected to be on a 5G network, with 4G expected to still have a dominant lead at 55 percent of connections in 2025. As the following chart, based on GSMA estimates, shows, Greater China is currently leading the race to 5G with 29 percent of mobile connections in the region utilizing the new standard.
