

20ft 5mwh energy storage container

Overview

What is Aceon energy storage?

AceOn offer one of the worlds most energy dense battery energy storage system (BESS). Using new 314Ah LFP cells we are able to offer a high capacity energy storage system with 5016kWh of battery storage in standard 20ft container. This is a 45.8% increase in energy density compared to previous 20 foot battery storage systems.

What is a 5 MWh battery?

5+MWh capacity□optimized for utility scale application, ensuring peak shaving and grid stability. Features 314Ah LFP battery cells, 20ft standard container design, high energy density, and multi-level safety. High corrosion-resistant and compliant with global environmental standards.

What are the advantages of a 1500V energy storage system?

Integrated energy storage system, easily on the installation, operation and maintenance; ● Multiple balancing measures to ensure consistent battery life cycle; ● Integrated gas and water fire extinguishing device to ensure system safety under extreme circum-stances. ● Based on the 1500V platform design, the DC side efficiency can reach 93%□.

Can I deploy multiple battery containers?

We can offer flexible deployment of multiple battery containers supporting both back-to-back and end-to-end installations. The battery container is compatible with the leading global inverter manufacturers such as SMA & Power Electronics with up-to 2.5MW of power per battery container.
