

# 2MW Off-Grid Solar Containerized Power Plant for Chemical Plant

## Overview

---

What is a 2 MW solar power plant?

A 2 MW (Megawatt) solar power plant generates approximately 8,000 units (kWh) per day under ideal sunlight conditions in India, or about 24,00,000–28,00,000 units per year, depending on location and system efficiency. These systems serve factories, IT parks, manufacturing units, and large institutions aiming to:

What is a polinovel 2mwh commercial energy storage system?

Max. Efficiency Get your Exclusive Offer! Polinovel 2MWH commercial energy storage system (ESS) is tailored for high-capacity power storage, ideal for large-scale renewable energy generation, PV self-consumption, off-grid applications, peak shaving, and emergency backup power.

How much does a 2 MW solar plant cost?

The cost of setting up a 2 MW solar plant varies depending on location, component quality, and installation complexity. However, the average total project cost ranges from INR 8.5 crore to 10 crore. 9.54 Cr. (Approx.).

What are the benefits of a 2 MW power plant?

A 2 MW plant not only reduces operational power costs but also generates steady revenue through energy export under PPA/gross metering, especially when long-term agreements with DISCOMs or private buyers are in place. Energy Cost Savings: Reduces or eliminates monthly electricity bills.

## 2MW Off-Grid Solar Containerized Power Plant for Chemical Plant
