

48V 550W Solar PV Panel

Overview

What is a 48 volt solar panel?

Don't confuse a 48v solar panel with a 48 watt solar panel by accident. The power of a panel, which is measured in watts, equals voltage multiplied by current. Thus, the fact that the voltage of solar panels is 48v allows them to produce more energy than 12v or 24v panels. The most powerful PV modules are rated at 48 volts.

What is a 550-watt solar panel?

This 550W solar panel is an high-powered option for generating maximum power from limited roof space. - It's an economical long-term investment for utility-scale systems, solar power plants, and residential and commercial applications.

How much does a 48V solar panel cost?

On our website, you will find a vast variety of 48V solar panels that are suitable for any budget. The price range for this type of solar panel is from \$175 to \$550. Of course, the price of a 48V solar panel system highly depends on the brand.

What is the maximum power output of a solar panel?

With a maximum power output of 550W and a cell efficiency of 21.3%, it is ideal for those looking to maximize energy production on limited space. The panel utilizes half-cell technology, which reduces power loss and boosts overall system efficiency, especially in shaded conditions.
