Overview

How many battery cabinets can A Powerware 9315 support?

Several battery capacities are available. The UPS battery cabinets can be paralleled. With this capability, you can increase your battery backup time by adding battery cabinets to your UPS system. The Powerware 9315 can support up to four battery cabinets. A breaker is located inside each battery cabinet supplied by the UPS manufacturer.

What is a battery cabinet?

The battery cabinet is installed in a standalone configuration. The term standalone refers to battery cabinets that may be installed adjacent to the UPS or in a separate location, are wired with external customer-supplied conduit and wiring, and may use the battery cabinet breaker as the battery isolation device or a switch.

What is a battery cabinet (IBC) system?

Battery Cabinet (IBC) systems are housed in single free-standing cabinets. Model IBC-L with a single battery voltage range is available to meet application runtime needs. Up to four cabinets may be installed to further extend battery runtimes. The cabinets match the UPS cabinet in style.

How do I install the 9395 model IBC-L Battery Cabinet?

The 9395 Model IBC-L battery cabinet is designed to be installed in a standalone configuration using up to two battery cabinets. Power wiring is installed externally between each battery cabinet and the UPS or battery disconnect using conduit. Battery
