

50 kW solar power generation in Azerbaijan

Overview

How can Azerbaijan increase the share of renewables in electricity production?

The government of Azerbaijan aims to increase share of renewables in total electricity production to 30% by 2030. To accelerate investments and production in renewable energy, Azerbaijan is offering the following tax incentives : Azerbaijan's renewable energy sources are hydropower, wind, solar, and biomass power plants.

Can Azerbaijan be a solar energy producer?

The region's favourable climate, boasting 2,400-3,200 hours of sunshine annually, gives Azerbaijan strong potential as a solar energy producer. In October, the 230 MW Garadagh Solar PV Plant was inaugurated. Several other projects are underway, and the country continues to sign agreements with stakeholders interested in its solar energy.

What is the economic potential of solar energy in Azerbaijan?

Azerbaijan's economic potential of solar energy is 23 GW. The region's favourable climate, boasting 2,400-3,200 hours of sunshine annually, gives Azerbaijan strong potential as a solar energy producer. In October, the 230 MW Garadagh Solar PV Plant was inaugurated.

When did Azerbaijan start installing a solar plant?

Azerbaijan began installment of its first major solar plant in 2023. The government of Azerbaijan aims to increase share of renewables in total electricity production to 30% by 2030. To accelerate investments and production in renewable energy, Azerbaijan is offering the following tax incentives :

50 kW solar power generation in Azerbaijan

[Azerbaijan's Green Energy Transition Initiatives](#)

The region's favourable climate, boasting 2,400-3,200 hours of sunshine annually, gives Azerbaijan strong potential as a solar energy producer. In October, the 230 MW Garadagh ...

[Azerbaijan's solar energy generation up 12%](#)

Oct 18, 2025 · In January-September of 2025, Azerbaijan's solar power plants generated 484.1 million kWh of electricity, marking a 12% increase year-on-year, Report informs, citing the ...
