

500kw Sunshine Inverter

Overview

What is a solar Ware 500 inverter?

The SOLAR WARE 500 is an advanced multilevel inverter system offering up to 500kW, with an operating range of 320 ~ 600 V. SOLAR WARE 500 operates at 97.7% maximum efficiency. With high efficiency and robust design, TMEIC can significantly maximize array performance and uptime.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.

What is the smallest 500 kW inverter?

The SOLAR WARE 500 advanced multilevel inverter uses a new circuit topology to create 3 output voltage levels. With this new design, the inverter size has also been significantly reduced, achieving the world's smallest 500 kW inverter, with switching loss reduced by 56%.

What makes the AE 500TX a good inverter?

Optional DC circuit breaker subcombiner enables low cost compliance with current safety and electrical codes. Built-in advanced power controls and optional factory-installed performance monitoring make the AE 500TX the industry's most fully integrated and configurable inverter in its class, saving installation time and expense.
