

5MW Qatar photovoltaic containerized cement plant

Overview

How many megawatts does Qatar's new solar plant produce?

The addition of 875 megawatts from these two new solar plants, along with the 800 megawatts produced by the Al Kharsaah plant that came into service in 2022, will bring Qatar's total solar energy production capacity to nearly 1,700 megawatts.

Which country is developing a massive solar project in Dukhan?

Moreover, Qatar Energy continues to develop a massive solar project in Dukhan area with a production capacity of 2,000 megawatts, set to become one of the largest solar plants globally. It is expected to be operational by the end of this decade.

How many solar power plants will be built in Mesaieed & Ras Laffan?

This project includes 2 large scale photovoltaic (or PV) solar power plants to be built in Mesaieed Industrial City (MIC) and Ras Laffan Industrial City (RLIC), and is expected to start electricity production by the end of 2024. The two mega-solar power plants are set to generate 875 MW of renewable electricity.

How has Qatar improved its solar energy sector?

Since the launch of Al Kharsaah plant in 2022, with an initial capacity of 800 megawatts, Qatar rapidly enhanced its solar energy sector, doubling its capacity within just three years, which is a remarkable achievement in itself.
