

Aarhus power station generator in Denmark

Overview

Is Aarhus a sustainable port?

The Port of Aarhus, Denmark's largest commercial port, has announced the finalization of an agreement to develop one of the most advanced shore power facilities in Europe. This initiative represents a significant step forward in reducing emissions and enhancing sustainable port operations in Northern Europe.

Is Aarhus a green port?

With the completion of the shore power facility in 2026, the Port of Aarhus will continue to set benchmarks in green port operations. This project underscores the port's mission to connect Denmark with the world while embracing sustainable solutions for a changing global economy.

Why is the port of Aarhus launching a shore power facility?

Anne Zachariassen, COO of the Port of Aarhus, emphasized the importance of the project "We are pleased that we can once again collaborate with PowerCon to establish a shore power facility. It will reduce both noise and local particle pollution caused by ships using diesel generators.

When will Aarhus' shore power project be operational?

The facility is expected to be operational by 2026, furthering the port's efforts to become a leader in sustainable port operations. The shore power project is part of the "OPS Network," a collaborative initiative involving key Northern European ports, including Aarhus, Gothenburg, Bremerhaven, and Stockholm.
