

Abu Dhabi flywheel energy storage manufacturer

Overview

What is EWEC doing in Abu Dhabi?

Located in Abu Dhabi, the project will feature a 5.2 gigawatt DC solar photovoltaic plant, coupled with a 19 gigawatt-hour battery energy storage system, setting a global benchmark in clean energy innovation. “In collaboration with EWEC and our partners, we will develop a renewable energy facility capable of providing clean energy round the clock.

What are the benefits of a flywheel system?

2. Renewable Energy Integration These systems are particularly effective for integrating renewable energy sources, such as wind and solar. Flywheels can store excess energy generated during peak production times and release it when generation is low, ensuring a consistent energy supply.

What is flywheel energy storage?

Flywheel energy storage is a technology that stores kinetic energy in a rotating mass. When energy is needed, the flywheel's rotation is converted back into electrical energy. This process is highly efficient and allows for rapid charging and discharging cycles.

Who makes flywheel energy storage systems (fess)?

Amber Kinetics manufactures flywheel energy storage systems (FESS). Long-duration flywheels results in safe, economical and reliable energy storage.
