

# Accra energy storage exports account for 20

## Overview

---

Why is the energy sector a problem in Ghana?

Long delays in payments to power producers are a significant concern in the sector as the government pays for the subsidy from the national budget. Debt within the energy sector, coupled with the high cost of power in Ghana, creates a brake on Ghana's economic development.

What are Ghana's energy needs in 2025?

Ghana's energy needs continue to grow. In 2025, projected electricity consumption is estimated to reach 25,836 GWh, representing a 4.7% increase in demand year-on-year. Hydro, thermal, and renewables constitute Ghana's electricity generation mix.

How much electricity does Ghana import?

In 2000, Ghana's electricity import stood at 864 GWh, while it exported 392 GWh, leading to a negative net export of -472 GWh. This trend of negative net export persisted for the following five years, with the country importing more electricity than it exported.

How much did Ghana's export prices increase in Q1 2023?

This means that the general prices for Ghana's export commodities on the average increased by 20.4 percent between Q1 2023 and Q1 2024, whereas the prices for imported commodities increased by 11.5 percent in the same period. The quarter-on-quarter increase in export prices is 7.8 percent, and 3.0 percent for import prices.
