

After-sales service for government procurement of fixed solar-powered containerized solar panels

Overview

Why do federal agencies need O&M services for solar PV systems?

Federal sites host more than 3,000 solar PV installations. With this large fleet of PV systems, agencies need to adopt effective O&M plans to ensure that these systems provide years of safe and reliable energy production. Many agencies lack the resources and personnel to perform O&M services to their PV systems.

Where can I learn about solar photovoltaics operations & maintenance?

In partnership with the Department of Energy's Federal Energy Management Program and the California Energy Commission's Empower Procurement Program, Berkeley lab is offering three trainings regarding solar photovoltaics operations and maintenance. The first two webinars in this series can be found below.

What is a solar PPA?

A solar PPA is a financial contract in which a third-party developer owns, operates, and maintains the PV system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

Where can I get a solar power purchase agreement?

Request for Proposal: Rooftop Solar Power Purchase Agreement. Available at 23 U.S. Department of Energy Technical Assistance Program. December 8, 2010. Procuring and Implementing Solar Projects on Public Buildings. Webinar available at 24 Town of Thatcher, Arizona. August 18, 2010.
