

After-sales service for three-phase mobile energy storage containers used in farms

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

What is a battery energy storage system (BESS)?

BESS (Battery Energy Storage System) is a technology that stores electrical energy in batteries and releases it when needed. It is widely used in power grids, commercial and industrial facilities, and even homes to improve energy efficiency, reduce costs, and enhance power reliability.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
