

# Alofi installs solar panels

## Overview

---

Did Chinese robot install thousands of solar panels at Australian solar project?

Home » Solar » Chinese robot does job of three to four humans installing thousands of panels at Australian solar project.

Who is using artificial intelligence to build a solar installation robot?

CT Green Capital is only one of many utility-scale developers turning to automation. On the other side of the world, Neoen Australia is currently trialing artificial intelligence-powered installer robots manufactured by Chinese company Leaping, at its 350 MW Culcairn Solar Farm in Riverina, New South Wales.

How efficient is leaping solar installation compared to manual operations?

“The installation efficiency has increased by 3-5 times compared to manual operations,” Leaping said. Leaping was founded in 2022 in Shanghai and builds smart cleaning tech for solar panels and the installation robot.

Does leaping have a solar module mounting robot?

Chinese tech company Leaping has successfully completed its first commercial deployment of photovoltaic (PV) modules with an AI-driven solar module mounting robot in Australia. Automatic navigation PV module mounting robot. Image by: Leaping.
