

Aluminum sheet for solar container battery

Overview

Are aluminum alloy sheets suitable for lithium-ion battery cases?

At HDM, we have developed aluminum alloy sheets that are perfect for cylindrical, prismatic, and pouch-shaped lithium-ion battery cases based on the current application of lithium-ion batteries in various fields. Our aluminum alloy materials are user-friendly, compatible with various deep-drawing processes.

What are aluminum battery cases made of?

Aluminum battery cases are made entirely from aluminum or aluminum alloys, providing high strength-to-weight ratio, good heat dissipation, and corrosion resistance.

How to choose the best aluminum battery housing material?

Choosing a high-quality aluminum battery housing material and selecting the optimal encapsulation process based on the characteristics of the case material is essential for ensuring the safety and service life of the battery. Currently, 3003 aluminum sheet is typically used for electric vehicle aluminum battery housings.

What is a UACJ battery case?

UACJ supplies high-strength aluminum alloys that help to realize thinner lithium-ion battery housing cases. They have been praised for the resulting cost reductions, and have a solid track record in the consumer goods sector. They are also ideal for use with large in-vehicle lithium-ion battery housings.
