

Are home solar lights reliable

Overview

Are solar lights worth it?

In our guide about how to buy solar lights, I went over lumens and Kelvin, measures of brightness and color. For bright solar lights, you need around 300 lumens, and it should be above 3000 Kelvin for a bright, light white that illuminates everything. Bright solar lights can be worth it, you just have to shop around.

Are solar post lights a good choice for outdoor lighting?

If you need more options with your outdoor lights, these lights can be transformed into any color, so they're perfect for atmospheric lighting. Solar post lights are particularly cheap compared to wired-in post lights. For example, this four-pack of Bobcat Solar Pathway Lights at Amazon costs \$79.95.

Are solar street lights expensive?

Solar street lights are also common in various roads and public lighting places. The price of solar lights can be as cheap as tens of dollars or as expensive as hundreds of dollars. The solar lamp with dozens of dollars is used in the home, the brightness is low, the lighting time is short, and the life span is about one year.
