

Are there any solar panels

Overview

What are the different types of solar panels?

Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best system for your home.

What is the best solar panel type?

Whilst monocrystalline is considered the best solar panel type and continues to dominate with a 90-95% share of the market, other panel types like PERC and thin-film panels are becoming increasingly common.

How do I choose the best solar panel?

Ensure you select a solar panel type that fits your needs while supporting broader environmental goals. Discover the different types of solar panels - Monocrystalline, Polycrystalline, and thin film. Learn their pros and cons, efficiency, cost, and key considerations to select the best solar panel for your needs.

What is the most affordable solar panel type?

Designed to be lightweight and flexible, thin-film panels are often considered the most affordable solar panel type, but this is not always true and depends on the semiconductor material used.

Are there any solar panels
