

# **BESS Energy Storage Equipment Bidding**

## Overview

---

What does Bess stand for?

The tender for the design, manufacture, installation and 20-year operations & maintenance (O&M) of battery energy storage systems (BESS) for Power China's 2025-2026 projects was announced on 13 November, and the results were released last week.

How much power does Bess sell?

It is displayed in Fig. 14, at  $t = 4$ , BESS#15 sells 90 % of active power in the DAM and 10 % in the RTM; at  $t = 14$ , it sells 48 % of active power in the DAM and 52 % in the RTM, and at  $t = 22$ , it sells 62 % of active power in the DAM and 38 % in the RTM.

How much reactive power does Bess supply?

BESS can supply nearly 10 MVAR of reactive power by consuming a small amount of energy. Fig. 11 plots the SOC of BESS#7 in different case studies. In most periods during the next day, due to the highest price uncertainty and the owner's risk aversion policy, case study 1 has the highest SOC.

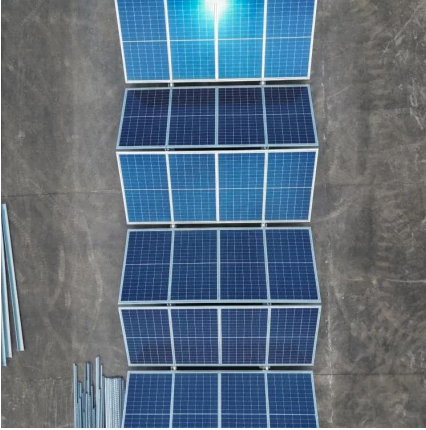

What is a battery energy storage power station (Bess)?

In recent years, battery energy storages stations (BESSs) account for the largest proportion in large-scale energy storage power station projects due to its advantages such as rapid response, high integrated power, decreasing cost year by year and short construction cycle.

## BESS Energy Storage Equipment Bidding
