

Bangi off-solar container grid inverter manufacturer

Overview

What is an off grid solar inverter?

The off grid solar inverters are also known as a stand-alone power system (SAPS), which is not connected to the electricity grid but require battery to charge & supply power. These inverter systems can generate enough power throughout the year and have enough battery capacity to meet home requirements.

Why do you need an off-grid inverter?

The Off Grid Inverters are designed to provide your business or home with dependable electricity. They have superior AC output characteristics and effective surge capabilities. Also, they help in effective use of available AC power and simplifying expansion of a system.

Do off grid inverters need batteries?

They are compatible with energy sources like Solar, Wind, Generator or Hydro. And such systems need batteries to store the electricity. The Off Grid Inverters are designed to provide your business or home with dependable electricity.
