

Basement solar light guide system

Overview

Can solar tubes light a basement?

In contrast, solar tubes can direct daylight at an angle through multiple layers in a building. That is why solar tubes can even light up a basement. Skylights are typically squarish and hard to miss when you walk into a room. In contrast, solar tubes can come in a wide array of permutations in design.

Do solar tubes need a light bulb?

Yes, if you choose the right type. If you need light at night for this space, go for a solar tube model that includes a light bulb. You can't expect solar tubes to be as bright as skylights. Solar tubes and skylights may serve the same function, but they have slightly different strengths.

What are the components of a solar tubing system?

The following are the primary components of a solar tubing system: Rooftop dome: Collects and focuses sunlight into the tube. Made of UV-protected acrylic or glass. Reflective tubing: Lined with a mirror-like film that reflects up to 99.7% of light. Angles down into interior space.
