

Battery cabinet charging and discharging test equipment

Overview

What is a battery charge & discharge test chamber?

The battery charge&discharge test chamber is a device specially designed for charging and discharging safety tests on batteries (such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate.

What is a battery charge and discharge tester?

8.1 The battery charge and discharge tester is composed of 8-channel 500V150A power system and the 8 channels can be used in parallel to form an maximum output capability of 8-channel 500V or 1200A , which can meet the needs of charge and discharge and pulse discharge for cycling and pulse test of high power battery.

What is a battery cycle charge and discharge system?

Product description: The battery cycle charge and discharge system is a testing equipment for high voltage battery pack cycle life test, charge/discharge test, capacity test and charge-discharge efficiency test. This tester is an energy feedback type, bidirectional and 8-channel power processing system controlled by computer.

What is a Sanwood battery charge & discharge test chamber?

Sanwood battery charge & discharge test chamber is a device specially designed for charging and discharging safety tests on batteries (such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate the safety and stability of the battery .
