

Bess system for solar factory in Puerto-Rico

Overview

Will a Bess system be installed in Puerto Rico?

One of the three stand-alone BESS systems will be installed through Puerto Rico's Accelerated Storage Addition Program, a program designed for BESS at sites requiring minimal effort to interconnect and contribute to a more stable electric power supply on a quicker timeline.

How will Puerto Rico benefit from a solar PV system?

The solar PV system will generate power directly to Puerto Rico's grid, and the battery storage facilities will provide system resilience by providing capacity and stability services that currently come from central power plants.

What does Pattern Energy do for Puerto Rico?

Pattern Energy's investments contribute to the 3,750 MW of solar PV and 1,500 MW of 4-hour battery energy storage systems Puerto Rico plans to install through 2035 to meet the island's goal of generating 100% clean energy by 2050. Today's announcement supports low-income communities in developing economic opportunities.

What is the Puerto Rico energy resilience fund (PR-ERF)?

In December 2022, President Biden authorized \$1 billion for the establishment of the Puerto Rico Energy Resilience Fund (PR-ERF), which is administered by DOE's Grid Deployment Office. The PR-ERF is a separate federal funding source to drive key investments in renewable and resilient energy infrastructure in Puerto Rico.
