## Overview

---

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

What is the power rating of a single phase inverter?

The larger single-phase inverters have continuous power ratings of 8kVA and 10kVA, with reasonable peak (surge) backup power ratings of 13.6kVA, enabling backup of large loads, including air-conditioning, water pumps, and other high-surge loads.

Who makes the best solar inverter?

A well-known brand in the solar industry, SMA produces high-quality string and central inverters for both residential and commercial solar systems. 4. Ginlong Technologies Co. Ltd.

How do I select a hybrid inverter?

When choosing a hybrid inverter, it's important to consider its capabilities and how they can be customized to suit your needs and preferences. To help you make an informed decision, consider consulting with an accredited solar and battery specialist like Jason Svarc, who has over a decade of experience in designing and installing solar and battery systems.
