

# **Bifacial solar panel production in Osaka Japan**

## Overview

---

How big is Japan's solar industry?

The Japanese solar industry, with a current capacity of 75 GW, is set to reach 108 GW by 2030, driven by a 9.2% CAGR and expected to exceed USD 10 billion in revenue by 2025. Government policies, including Feed-in Tariffs, and growing investments in residential, commercial, and utility-scale projects.

What makes Japan's solar panel manufacturing industry unique?

In conclusion, Japan's solar panel manufacturing industry is renowned for its innovation, quality, and commitment to sustainability. Leading companies like Primroot.com, Sharp, Kyocera, Mitsubishi Electric, and Panasonic produce high-performance solar products that meet stringent safety and efficiency standards.

What are bifacial solar panels?

The bifacial solar panels allow infrared radiation to pass through the surface due to high transparency; the operating temperature of the bifacial solar panels is at least 10 °C less than the monofacial solar panels. Eight types of bifacial solar panels are being commercialized and available in the market.

Who makes Kyocera solar panels?

Known for their durable and reliable products, Kyocera designs and manufactures high-performance solar panels that cater to both residential and commercial markets. The company is headquartered in Kyoto, Japan, with manufacturing facilities in Japan and China, and has a long-standing reputation for innovation in solar technology.
