

Bigblue solar container outdoor power

Overview

Can BigBlue 36W solar charger be used outdoors?

The BigBlue 36W solar charger is suitable for use outdoors, such as during a trek, hiking, or camping. It can handle exposure to damp conditions like morning dew or light rainfall. Note: The solar panels charger cannot store electricity; you need to connect your device directly to the solar panels in outdoor sunlight.

How many solar panels does a BigBlue solar charger have?

The BigBlue solar charger has five panels that fold up into the footprint of a single panel. Four are solar panels, and the fifth has a device pocket and three USB charging ports. Four eyelets on the corners attach to included mini-carabiners for securing the panel to whatever your setup is.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
