How much does a battery management system cost?

Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets: Ewert Energy Systems – One of the earliest BMS providers (since 2008), Ewert focuses exclusively on high-end custom BMS design, especially for large-scale battery storage systems. Typical price range: \$3,000-\$10,000.

How much does a BMS cost?

Prices increase with higher voltage, amp capacities, and parallel/series configurations. Battery Voltage – BMS pricing often correlates to common battery voltages used. For example, basic 12V BMS price for small power banks average \$30-\$200, while 24V BMS price for golf carts or marine run \$100-\$500. High voltage BMS for EVs starts around \$1000.

How much does a passive battery management system cost?

When voltage or temperature thresholds are exceeded, passive BMS cuts off charge or discharge to prevent cell damage. Key functions include overcharge protection, undervoltage protection, and balancing cells. Passive BMS offers adequate safety for smaller battery banks in low-budget projects. Average passive BMS price range: \$100-\$500.

How much does a hybrid battery management system cost?

With almost full capabilities at partial costs, hybrid BMS presents excellent middle-ground options for many lithium battery applications. Average hybrid BMS price range: \$800-\$1,500. Capabilities and pricing can vary widely for BMS. Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets:
