

# **Bms battery management system kit**

## Overview

---

What is a battery management system (BMS)?

The BMS protects the battery from operating outside the specifications, balances it, monitors the health of the cells and communicates the battery status to higher-level systems. STMicroelectronics provides a range of integrated circuits allowing to build up battery management systems for Lithium Ion batteries.

What is STMicroelectronics battery management system (BMS) solution?

Designed for high-reliability automotive applications and energy storage systems. Ideal for automotive chassis and safety applications. STMicroelectronics Battery Management System (BMS) Solution is a complete battery management system for up to 15 packs with 14 cells each.

How does St evaluate a battery management system?

ST's solution for a battery management system can be easily evaluated with the help of a scalable kit of evaluation boards, allowing to adapt the solution evaluation to merely every battery partitioning.

Can EMUs BMS be used for EVs?

Many individuals and businesses have effectively utilized the Emus BMS to create EV's, solar & wind energy storage systems for both industrial and residential applications, incorporating hybrid inverters. Choosing a selection results in a full page refresh. EMUS Battery Management System for EV Modules.
