

Cadmium telluride solar glass integrated

Overview

Cadmium Telluride (CdTe) Power Glass is a cutting-edge photovoltaic glass technology that integrates thin-film solar cells into architectural glass. What is cadmium telluride (CdTe)?

Cadmium Telluride (CdTe) CdTe has become a leading TFPV technology, gaining market dominance due to its cost-effectiveness and improving efficiency. Its fabrication is simple and cost-efficient, using methods like electrodeposition or vapor transport deposition.

Can cadmium zinc Telluride and cdmgte be used together?

The incorporation of zinc or magnesium to form cadmium zinc telluride (CdZnTe) and cadmium magnesium telluride (CdMgTe) represents a possible way to move the bandgap into a viable regime for tandem incorporation, but using these materials introduces processing challenges that have thus far prevented their use in high-throughput manufacturing.

Can TCO-coated glass reduce the cost of CdTe modules?

Recently, Vitro Architectural Glass agreed to supply TCO-coated glass to First Solar, expanding and upgrading their Carlisle, Pennsylvania plant.¹⁴ Supporting the growth, diversity, and scale of the domestic CdTe supply chain could reduce the production cost and increase the cost competitiveness of CdTe modules.
