

# Can solar lights be charged

## Overview

---

Yes, solar lights can still charge without direct sunlight by using indirect light sources such as indoor LED bulbs, halogen lamps, or even daylight through windows. Can You charge solar lights without sunlight?

In overcast or winter weather, you can easily charge solar lights with indirect sunlight. What's more, you can even charge your solar lights with no sunlight at all! Place the solar panels directly underneath a household light to charge them as quickly as possible without sunlight. Place your solar lights as close to the light bulb as possible.

Can solar lights charge batteries?

Solar lights require some direct exposure to sunlight for effective battery charging. Solar cells can charge the batteries in shadows, but the charging efficiency is significantly reduced. Solar-powered lights are also limited by the number of charge cycles that the batteries can handle.

How to charge rechargeable batteries with solar lights?

The best way to charge the rechargeable batteries using the solar panel of your solar light is with direct sunlight. You can also use incandescent bulbs or indirect sunlight but it is not ideal. Remember, to charge solar lights you do not need much sunlight.
