

Canberra solar Glass Project

Overview

What is the biggest embedded solar project in Canberra?

The University has opened a tender process for the installation of the biggest embedded solar project in Canberra at its Bruce campus. The project will install a 2-megawatt (MW) rooftop solar Photovoltaic (PV) array across 15 on-campus buildings, intended to maximise electrical energy consumption offset through solar embedded generation.

How can solar energy help a Canberra Business?

Solar energy systems and batteries are reducing emissions and helping Canberra's save money on energy bills. Specialist advice is available to help businesses. Systems that use the sun to generate power help reduce our dependence on burning fossil fuels.

Is a solar system right for my Canberra home?

Your daytime use could be free if your solar system is making enough electricity. Many Canberra households have adopted rooftop solar systems, using solar helps support the ACT's electricity supply to be 100% renewable. Use our Solar Calculator to determine if a solar system is right for your home.
