

# Chilean solar modules

## Overview

---

How many solar projects are there in Chile?

There was 5,681 MW of large-scale solar, while distributed-generation projects accounted for the remainder. PV became the electricity generation technology with the greatest presence in Chile in 2023. Of the more than 8,500 MW that is currently in operation, 71% is installed between the northern regions of Arica Parinacota and Atacama.

How many ground-mounted solar projects are in Chile?

Since making their initial investment in Chile in 2017, CC&L Infrastructure and CarbonFree have significantly expanded their portfolio, with 37 individual ground-mounted solar projects in operation and a further 16 projects currently under construction or expected to begin construction shortly.

How many solar panels did Chile install in 2023?

From pv magazine Latam Chile deployed 1.652 MW of new PV systems in 2023, according to new statistics from Acesol, the Chilean PV association. The country's cumulative installed solar capacity reached 8.5 GW as of the end of December 2023, which represents around 25.6% of its total power generation capacity.

How much solar power does Chile have?

Chile's cumulative installed PV capacity reached 8.5 GW at the end of December 2023, on 1.65 GW of new projects for the year. The cumulative PV total represents 25.6% of the nation's total power generation capacity.
