Overview

Can You import solar modules from China to Europe?

When importing solar modules from China to Europe, various pitfalls can arise in the logistics process that may disrupt the schedule or cause unexpected costs. Here is an overview of the most common risks: Customs is a central checkpoint — but it is precisely here that delays can occur.

Where do solar modules from China go?

Most solar modules from China travel to Europe by sea freight – because this is where cost savings and large capacities come together. The most important ports for exports are Shanghai and Ningbo, from where containers leave for Europe every day. Important to know:.

How are solar modules transported in Europe?

Most solar modules are transported further within Europe by truck. Especially in Germany and the EU, road transport is often the fastest and most flexible way to reach even remote locations. However, transporting solar modules is not an everyday freight – they are sensitive and must be handled properly to avoid damage.
