

China Technology Energy Storage Project

Overview

What is China's energy storage policy & regulatory roadmap?

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to 180GW by the end of 2027.

What is China's Energy Storage plan?

The plan's target represents a significant scaling up, even for the world's leading adopter and producer of energy storage technologies. According to official National Energy Administration data from its recent 'China new energy storage development report 2025,' the country's installed base at the end of 2024 totalled 73.8GW/168GWh.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Why is energy storage important in China?

As China accelerates the deployment of renewable energy, the stability of the power system faces persistent operational constraints. Energy storage, serving as a pivotal enabling technology for the energy transition, has witnessed rapid development nationwide.

China Technology Energy Storage Project

[China switches on its largest standalone](#)

...

Jul 21, 2025 · This project is the largest hybrid energy storage installation in China and hosts the world's largest grid-forming vanadium redox flow ...

The prospects of energy storage technology development in China...

Dec 1, 2025 · This model is used to assess the economic and environmental feasibility of two energy storage technologies in China during 2017-2060. The results indicate that the ...

[China Achieves Breakthrough in Core Energy Storage ...](#)

Apr 26, 2025 · Compressed air energy storage (CAES) is a highly efficient large-scale energy storage technology that stores excess electricity by compressing air during off-peak hours and ...

China powers up nation's largest standalone battery storage project

4 days ago · A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction ...

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

China's First Shared Energy Storage Demonstration Project ...

Apr 1, 2025 · This marks the first domestic shared storage demonstration project to integrate four types of new energy storage technologies--lithium iron phosphate, sodium-ion, vanadium ...

[China targets 180GW of installed BESS capacity by 2027](#)

Sep 17, 2025 · The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to ...

China switches on its largest standalone battery storage project

Jul 21, 2025 · This project is the largest hybrid energy storage installation in China and hosts the world's largest grid-forming vanadium redox flow battery, set to reach a 250 MWh/1 GWh ...

[Top five energy storage projects in China](#)

Sep 10, 2024 · The Salt Cavern Compressed Air Energy Storage Phase-I is a 300,000kW compressed air storage energy storage project located in Tainan, Shandong, China. The electro ...

[China Achieves Breakthrough in Core Energy ...](#)

Apr 26, 2025 · Compressed air energy storage (CAES) is a highly efficient large-scale energy storage technology that stores excess electricity by ...

[Across China: Pioneering energy storage system lights up ...](#)

Jul 13, 2025 · In a landscape with an average altitude of about 4,700 meters, this pioneering energy storage system developed by tech giant Huawei, based in south China's Shenzhen, ...

[China leads the world in new-type energy storage capacity](#)

Sep 11, 2025 · China's energy storage sector is rapidly diversifying project applications and accelerating the rollout of multiple technological pathways. Bian noted that in 2024, the NEA ...

[China targets 180GW of installed BESS ...](#)

Sep 17, 2025 · The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion ...
