

China blown fuse in circuit breaker Factory

Overview

Does a blown fuse need a circuit breaker?

Replacing a blown fuse is a simple DIY repair that costs little to perform. However, if your home blows fuses often, it may indicate that your fuse box needs upgrading to a circuit breaker panel, perhaps with higher amperage available. Only a local electrician should replace a fuse box with circuit breakers.

What is a fuse & how does it work?

A fuse is an electrical component designed to protect electrical circuits by safely opening the circuit under abnormally high current loads. Fuses come in many shapes and sizes, but each one is designed to protect a circuit with a specific set of electrical parameters.

What are striker fuses?

Striker fuses are fuses fitted with a spring-loaded striking device that can trip adjacent switches and also indicate that a fuse has blown. A Type C fuse is actually a type of miniature circuit breaker (MCB). MCBs are a type of circuit breaker used with lower-powered circuits to cut off current in the event of an overload.

What is a Type C fuse?

A Type C fuse is actually a type of miniature circuit breaker (MCB). MCBs are a type of circuit breaker used with lower-powered circuits to cut off current in the event of an overload. Type C fuses trip circuits when the current exceeds the rated one by between five and ten times - i.e. at 100-500 amps for a 20amp device.

China blown fuse in circuit breaker Factory

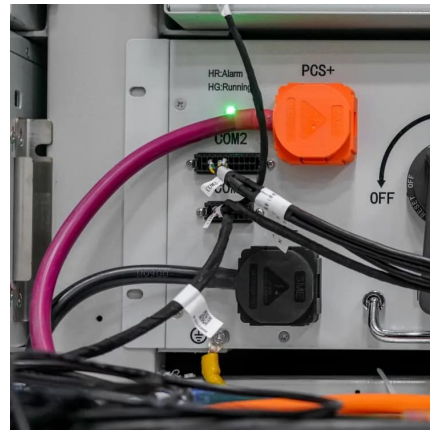

[China Fuse Manufacturers, Suppliers, Factory](#)

Jasco Electric Co.,Ltd is specializing to produce insulator, isolator switch, vacuum circuit breaker, lightning arrester, fuse which is the professional manufacturer in China.

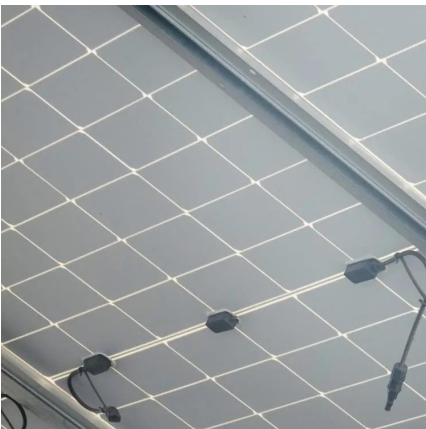

Blown Fuses Factory

Looking for blown fuses factory direct sale? You can buy factory price blown fuses from a great list of reliable China blown fuses manufacturers, suppliers, traders or plants verified by a third ...
