

Colored solar wall tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Which solar panels fit with orange roof tiles?

This solar roof panel fits in nicely with the orange roof tiles that are common in the Netherlands, and also complements other common roof and facade materials such as brick. Solarix coloured solar panels: the most beautiful colours and designs for facades and roofs!.

What makes Solarix coloured solar panels unique?

Using a unique technique, Solarix produces coloured solar panels with a deep colour experience in combination with high-energy generation. The innovations in high-quality ceramic colour techniques in the Solarix colours ensure that the solar panels match perfectly with other materials in construction, such as stone, composite, wood and aluminium.

Are coloured solar panels a good choice?

And our coloured solar panels can significantly prevent those emissions. In addition to colourful solar panels, Solarix offers various variants of white, black and grey-tinted solar panels. White is a highly sought-after colour for facade panels in building design, because it gives a fresh and bright appearance.
