

Container generator installation in South America

Overview

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

What is a containerized genset?

Most containerized gensets come equipped with built-in silencers and soundproof insulation, which reduces noise to acceptable levels for urban or commercial use. Containerized gensets are often designed for "plug-and-play" operation, allowing rapid setup and start-up. This is especially useful in emergency or disaster relief situations.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.
