

Democratic Republic of Congo Off-Grid Solar Container 2MW

Overview

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

Will a \$100 million solar project power Gemena & Bumba & Isiro?

An international consortium led by Powergrids plans to invest \$100 million in three off-grid solar plants intended to power the cities of Gemena, Bumba, and Isiro, which are located in the country's northern region and currently have no connection to the country's power network.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.
