

Djibouti BMS battery management company

Overview

What is the market size of battery management system (BMS)?

The battery management system (BMS) market is projected to rise from USD 10.2 billion in 2025 to USD 23.3 billion by 2035, growing at a CAGR of 8.6%. Lithium-ion BMS will capture 44% of market value in 2025 due to widespread use in EVs, storage systems, and electronics. The automotive sector alone will expand at 7.4% CAGR.

What drives the global battery management system (BMS) market?

Between 2020 and 2025, the global battery management system (BMS) market experienced considerable growth. While EV adoption became a major driver, another factor propelling BMS demand was the growth of renewable energy projects.

How much money does a battery management system generate in 2024?

The revenue generated by the battery management system in 2024 was USD 8.7 billion. In particular, battery management systems (BMS) offer key capabilities like cell monitoring, balancing, and thermal management, which can help optimize battery performance and safety.

What is a battery management system?

A battery management system is an electronic system that monitors and manages the operation and functionality of a rechargeable battery such as lithium-ion. It can be called the brain of the battery that helps enhance its safety, performance, charging rates, and longevity.
