

# Does Monterrey Mexico have solar air conditioners

## Overview

---

How many solar panels are in Monterrey?

Part of an \$18 million plant expansion investment, the newly installed solar panel array is the largest project of isolated battery-powered supply in Mexico. In total, close to 10,000 panels have been installed across Monterrey's three plants, with plans to be producing energy in 2024.

How many people in Mexico have air conditioners?

First plant opened in 2008, employing 500+ direct labor workers. 2022 expansion announcement for a new commercial HVAC unit plant. According to LG Electronics, about 30% of Mexican households have an air conditioner. % of Households with Air Conditioners in Mexico, 2020.

What is the HVAC industry like in Mexico?

The HVAC industry in Mexico is at a pivotal moment, driven by nearshoring trends, increasing demand for energy efficiency, and technological advancements. As one of the top global HVAC manufacturing hubs, Mexico plays a crucial role in supplying the North American market.

Can a solar panel power an air conditioner?

Solar panels, usually photovoltaic panels (PV panels), collect sunlight in their cells. The panels turn the sun's energy into electric power. This is DC power, and if you choose a DC air conditioner, the panels can be wired directly to it. Most AC's are AC power – that's confusing. Most air conditioners require alternating current power.
