## Overview

---

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.).

Can solar panels store energy?

It's important to note that solar panels cannot store energy. So your electric car can only be charged by the panels when it's sunny. To store energy from the panels, you will have to invest in a home battery system, like the Tesla Powerwall, or Nissan's xStorage.

What is a commercial solar battery storage system?

The commercial solar battery storage system is loaded with cell modules, PCS, photovoltaic controller (MPPT) (optional), EMS management system, fire protection system, temperature control system and monitoring system. The system configuration is modular, support multi-machine parallel, plug and play, easy to install and maintenance.

Why should you choose a IP54 solar shell?

The IP54 waterproof shell makes it perfect to adapt to a variety of indoor or outdoor industrial and commercial application scenarios, such as photovoltaic charging stations, industrial parks, farms, etc. Integrated Solar+ESS design, suitable for access of PV. New energy vehicles use PV clean electricity as priority.
