

Does the outdoor wireless base station have a battery

Overview

What is the TP-Link outdoor wireless base station?

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users. Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas.

Can Wyze base station be used wirelessly?

Wyze Base Station can be used wired with an ethernet cable or wirelessly with WiFi. The base station requires an ethernet connection to the router during setup. Once setup is complete, you can either keep the wired connection, or switch to a WiFi connection in the Wyze app. The camera will function while charging.

Why do I need a base station?

The base station is primarily used to improve the battery life by keeping the camera power consumption low. It also provides a reliable internet connection via an ethernet cable and removes compatibility issues with different router brands.

How do I connect my wireless camera and base station?

True plug and play, the wireless camera and base station feature auto-pair technology, you just plug the base station into outlet nearby, connect the base station to a monitor. NOTICE: Connect the base station to router and you can view it remotely on your phone.
