

Double-glass module price comparison

Overview

What is a double glass module?

Double glass module contains two sheets of glass, whereby the back sheet is made of heat strengthened (semi-tempered) glass to substitute the traditional polymer backsheets. With * Corresponding author. Tel.: +86 13776101913; fax: +86 51268961413.

What is double glass PV module?

Double glass PV module is known as the ultimate solution for the module encapsulation technique. Although double glass modules have many advantages, they are not yet widely used in photovoltaic power plants, for which one important reason is the large power loss due to the transmission of light in the cell gap region.

What is JAM72D40 575-600W n-type bifacial double glass high efficiency mono module?

JAM72D40 575-600W n-type bifacial double glass high efficiency mono module features Higher power generation better LCOE, n-type with very low LID, Better low irradiance response and better temperature coefficients.
