

# **EU Energy Storage Project Construction Project**

## Overview

---

How many energy storage projects are there in Europe?

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology. It lists 32 countries and is led by Germany, with 472 projects. It is followed by the United Kingdom (455 projects), Spain (147 projects) and Italy (112 projects).

What is the European energy storage inventory?

From pv magazine Germany The European Commission has officially launched the European Energy Storage Inventory, a real-time dashboard for energy storage. The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

How big is Europe's battery energy storage system?

Europe is racing to add very large grid batteries to balance rising wind and solar output. As of mid-late 2025, four utility-scale Battery Energy Storage System (BESS) projects stand out by size — each designed in the 0.5–2.8 GWh class and backed by reputable developers and public filings.

Which country has the most energy storage projects?

By far, the largest number of projects are located in the United Kingdom – 66 (6,2 GW). Italy is in second place (with 13 projects totaling 1.7 GW), followed by Germany (19 – 1.6 GW), according to the inventory. European Energy Storage Inventory – projects under construction by country

## EU Energy Storage Project Construction Project
