

Eastern European Microgrid Energy Storage Power Generation Manufacturer

Overview

What is EnergetIQ & microgrid?

EnergetIQ is flexible, scalable and based on Artificial Intelligence. Microgrids are decentralized energy systems consisting of a combination of renewable power generation, power storage and conventional power generation in order to meet a given demand. Other mtu systems and services that might interest you.

Why do we need a microgrid?

Microgrid solutions help sustain the future of energy and ensure reliable power supplies to meet customer demands. Economic growth and growing populations are changing customers' demand for power. Governments and industry are moving towards renewable energy sources such as solar and wind power.

Are microgrids the future of distributed power generation?

Microgrids are considered to be the future of distributed power generation. Haiti has had one in operation for many years - with suitable assistance from Rolls-Royce employees. Rolls-Royce is using mtu EnergetIQ to control its smart energy systems - all the way from simple emergency generator sets to complex microgrid set-ups.

What is a Rolls-Royce microgrid?

By integrating combined heat and power (CHP) plants, two battery storage containers, and advanced controls, this microgrid offers a reliable and cost-efficient power solution for industrial usage. Download the use case below to discover: How Rolls-Royce addresses the challenges of fluctuating energy demand with sustainable power.
